PROTECT EARTH

Appropriate or not?

These years, government brought kids up to space to train them into a “Unbreakable Army”, but if we think about it, is that really appropriate, the youngest kid is only 7 years old, when they are up there, they are not allowed to have connections with their families and friends on the earth, just think about it, isn't that too cruel for them. Psychologists had proved that, kids at this age learn fast, it is the best time for them to build up their relationships with others, they need to get along with the children at the same age as often as possible, that can be good for their mental health, and it will be easier for them to fit in the society in the future.

We think, what the government is doing, is the right opposite of this. Here is their explanation: “We need people to fight with our enemies, we need to destroy the roots of all the problems our enemies bring to us. Children think differently than grown ups, they think in a new and creative way which we can't, but to build a strong army, cleverness is not the only thing we need, but also a strong mind and healthy body. Bringing all the kids to space is one of the best choices, we isolated them from any information from earth, so they won't have much emotional connection with the earth, that can make them stronger instead of soft hearted, also it is easier to control all of them together, bringing them up to space for training is definitely good for all the human beings.”

But for real, is that really good for the children?
We believe it is not.

Great loss of the earth

Last evening, terrible news happened, our hero, Mazer Rackham left the world and headed to a better place. Mazer Rackham was known for his successful battle with the buggers. Let's all remember our hero forever and mourn him.

NO GRAVITY ON EARTH

Want to go to a place without Gravity? You don't need to go up to space, you can try it here at Ender Wiggin's amusementpark .

Bring this paper for 20%off!!!

MORE THAN FRIENDS

Ender Wiggin and Petra Arkanian are getting married! Ender and Petra were friends since they were still in a young age, they were partners at school, after days and days they found their relationship is more than friends. On the spaceship, they could only rely on each other, it was a cruel environment, they couldn't just trust others so easily. Although Petra is a few years older than Ender, she said that Ender is a very mature person, there's nothing to worry about, and she believes that they will now commit to each other for the rest of their life.

They supported each other both physically and mentally, and they made them decide to spend the rest of their life together, wishing for the best!

The wedding is on July 14th, 2210, in NASA Headquarters, located at 300 Hidden Figures Way SW, Washington, D.C., bring anything with you to celebrate this absolute good news, the wedding will start at 5 o'clock, don't be late.

SOME SAD NEWS

Five years ago today, we announced the death of John Paul Wiggin. Today is the anniversary of his death, let's talk about him a bit. John Paul Wiggin, born in Poland to a family of 9 children, was a really smart man since he was just a child. When he was five, he already could read a book from college, like a genius! He fell in love with Teresa Wiggin, after they got married, they had three children, Peter Arkady Wiggin, Valentine Sophia Wiggin, and Andrew Thomas Wiggin. John Paul will never be forgotten. We will treasure our memories of him.
